## About me

Software Developer with solid experience in backend development and a strong interest in frontend. Passionate about technology, programming, and software development best practices. Continuously seeking to learn and improve, and committed to sharing knowledge and contributing to team growth and success.

## Skills

**Languages & Technologies**  
Javascript, Typescript e JSON

**Backend**  
NodeJS, NestJS, Express, Fastify, Rest/RestFul, GraphQL, JWT, OAuth, Websockets

**Cloud & Devops**  
Azure, GCP, AWS, Docker, CI/CD

**Database**  
MongoDB, DynamoDB, PostgreSQL, MySQL, Redis

**Tools & Packages**  
Git, Npm/Yarn, Nvm, ESLint, Swagger, Prettier, Insomnia/Postman

**Methodologies**  
Scrum, Kanban, Code Review, Pair programming, Retro, Testes (Jest), Clean code, SOLID, Clean architecture

**Frontend**  
Html, Css, React, Vite, Api integration

## Extracurricular

- Rocketseat Ignite - NodeJS and ReactJS
- Udemy
- Alura
- Official Olympic Torch Bearer – Rio 2016

## Education

- Information Technology (IT)**  
*Centro Paula Souza - ETEC Guaianazes* 2015 - 2016
- Bachelor's Degree in Computer Science**  
*Universidade Cidade De São Paulo - UNICID* 2017 - 2021
- Postgraduate Degree in Software Engineering with Agile Methodologies**  
*Universidade Cruzeiro do Sul* 2022 - 2023
- English**  
*CNA Itaim Paulista* 2025 - Present

## Experience

- IT Technician**  
*Presente Escola* 2018 - 2019  
Responsible for managing corporate platforms, optimizing technology processes, handling CRM systems, and providing IT operational support.
- Full Stack Developer - Intern**  
*Go Wi-fi Corp* 2019 - 2019  
Development and enhancement of APIs and web applications, including building new features, system integrations, and implementing lead generation solutions.
- Data Analyst - Intern**  
*Benefício Certo* 2019 - 2020  
Management and enhancement of a CRM platform, supporting data analysis, generating strategic insights, and improving operational efficiency across the organization.
- Backend Developer (Mid-Level)**  
*Tag2U* 2020 - 2021  
Development of APIs for an e-commerce platform in a startup environment, focusing on scalability, performance, and security, using NestJS, GraphQL, and PostgreSQL.
- Backend Developer (Mid-Level)**  
*Aerolito* 2021 - 2021  
Development and maintenance of APIs for an online course platform using AWS, Node.js, and DynamoDB, focusing on scalability, performance, and reliability.
- Software Engineer (Mid-Level)**  
*Pixter* 2021 - 2023  
Development and maintenance of APIs and features for the Carro Fácil system (Porto Bank), working with microservices architecture and database adjustments using Node.js, MongoDB, SQL, GCP, and Strapi.
- Software Engineer (Senior)**  
*Meta (Insi)* 2023 - 2024  
Development and maintenance of APIs and features for the Carro Fácil system (Porto Bank), working with microservices architecture, database adjustments, deployment, and infrastructure support using Node.js, MongoDB, SQL, GCP, Docker, Cloudflare, Cloud Tasks, and Strapi.
- Software Engineer (Senior)**  
*Inex* 2024 - 2024  
Development and maintenance of features for the Telesena Virtual platform using NestJS and PostgreSQL, working with legacy database scripts to ensure system integrity and performance.
- Senior Software Engineer (Freelance)**  
*Elastic Code* 2025 - 2025  
Worked as a freelance Software Engineer at Elastic Code, developing the SST system from scratch for integration with eSocial using NestJS, PostgreSQL, and AWS, also contributing to frontend development. Additionally, worked on a Honda project, developing UI screens, features, and API integrations using C#.
- Software Engineer (Senior)**  
*GFT* 2024 - Present  
Development and maintenance of features for EDGE's gas distribution chain control platform, including inventory management, scheduling, user management, and contracts, using NestJS, Azure, MongoDB, and microservices architecture.
